## Instruction

1. Loosen all straps, insert thumb splint into lateral side of brace. Ensure thumb splint in correct position (for left or right).

2. Slide palm & thumb into the brace with the splint positioned along the palm & thumb.

3. a. Wrap straps #1 & #2 to proper tightness and then attach hook-side fastener onto the straps.  
b. Have strap #3 & #4 to wrap tight and attach the hook-side fastener to strap.  
c. Adjust #5 strap to suitable tightness and then attach to hook-side fastener.  
d. Double check the overall tightness before cut off the excess part of #5 strap for proper length.

## Caution

1. The product should be used under the supervision of a medical professional.
2. Over tightening of strap may compromise blood circulation.
3. If discomfort or pain results and persists, please discontinue wearing and consult with medical professional.
4. Make sure the fasteners are well fastened while wearing the brace. If the fasteners can not be fastened well, please stop using the brace to prevent injuries.
5. If product is in poor condition, please do not use it.

## Washing instructions

1. Separate the aluminum stay from the brace before washing.
2. Hand wash with mild detergent.
3. Rinse thoroughly and air dry.
4. Avoid direct exposure to sunlight.
